

Ted Bailey

I am value-orientated environmental and sustainability management consultant. I advise on strategy and program development, conduct performance evaluations and gap analysis, calculate baseline footprints, direct the implementation of company-wide standards and environmental management systems, conduct compliance reviews and audits, prepare corporate performance reports, advise on industry best practices, and support green/sustainability marketing efforts. I have a broad-based understanding and perspective on environmental issues and completed work assignments across Canada and the Caribbean. I am accessible and innovative with excellent leadership, communication, and team-work skills.

Specialties

Auditing and compliance management, ISO 14001 development and implementation, corporate planning - greening/stewardship/sustainability, policy/program/procedure development, gap analysis, pollution prevention and toxic reduction planning, wastewater process optimization

Certifications

Professional Engineer, Ontario

Certified Toxic Reduction Planner, Ontario
